FLASK

# Tailwind CSS

Tailwind CSS is basically a utility-first CSS framework for rapidly building custom user interfaces.

## FEATURES

- It is a highly customizable,
- Low-level CSS framework.
- Minimum lines of Code in CSS file.

# Flask

Flask is a web development framework developed in Python.

## FEATURES

- It is easy to learn and use.
- Flask is “beginner-friendly”.
- Many extensions are available for Flask, which can be used to enhance its functionalities.

## LEAFLET API

Leaflet allows to display tiled web maps hosted on a public server, with optional tiled overlays. It can load feature data from GeoJSON files, style it and create interactive layers.

## UNSPLASH API

The Unsplash API is a modern JSON API that surfaces all of the info you'll need to build any experience for your users.

## SPOTIFY WEB API

Using Spotify Web API, external applications retrieve Spotify content such as album data and playlists.
